

#### T-TEST;

At 95% confidence level , p-value (0.01) is less than significant level or alpha value ( 0.05) therefore we reject the null hypothesis implying there is statistically difference of the average price of the car.

#### TWO INDEPENDENT SAMPLE T-TEST;

At 95% confidence level , p -value (0.6802) is greater than Alpha value (0.05) therefore we fail to reject the null hypothesis implying there is no statistically difference of prices in foreign and domestic cars.
